FILA TECH-DRY MOISTURE MANAGEMENT

This fabric feature draws moisture and sweat away from the body by transferring it to the fabrics' outer layer, allowing it to evaporate quickly. The wicking fabrics dry rapidly, keeping you cool, dry, and comfortable during any activity.

ANTI-BACTERIAL

The anti-bacterial finish is highly effective for eliminating bacteria causing perspiration odor and has excellent washing durability.

ENGINEERED STRIPES

Using a sophisticated manufacturing process, the garment is built to ensure consistent stripe placement on every piece. This process maintains the integrity of the intended design.

RECYCLED POLYESTER (RPET)

Recycled polyester is an eco-friendly fabric which has been manufactured from 100% re-cycled pop bottles. This unique recycling process converts post-consumer plastics into high quality performance yarns, making the fabric extremely soft.

WARMTH RATING

The Fila warmth rating system gives the user a temperature guideline for thermal comfort.
